

SPECTRAL
SECURITY GROUP

BUSINESS **PROSPECTUS**

Overview

Spectral Security Group is an intelligence-based security company, utilising intelligence to make informed decision. Our focus is providing effective security services to our client in order to actively reduce threats/risks. Spectral securities business model is to assess known, unknown threats and apply strategic solutions to prevent such threats.

Spectral Security Point of difference

Atypical security companies utilise guard legends and pre-set security patrols, routines and methodology to protect assets, property and combat threat. This form of security services has significant deficiencies. Firstly, it does not have the ability to identify potential client threats and risks. Secondly it does not have the ability to mitigate such risks posed by our clients. At spectral we provide measurable strategies to combat these risks.

Artificial Intelligence

Spectral is the first security company to utilise Artificial Intelligence software to analyses data from incidents and provide a strategic solution. Our unique algorithm function allows pattern recognition to extract and tabulate appropriate solutions.

MISSION STATEMENT:

At Spectral we provide operational transparency & accountability to deliver successful outcomes

Point of difference between other security companies.

Intelligence is a process where information is collected, analysed and developed through the application of various techniques resulting in increased understanding or knowledge. The cornerstone of any strategic decision in terms of security is intelligence.

Spectral security is an intelligence-based security service providing a tailored solution to clients' needs.

SERVICE CONTENT

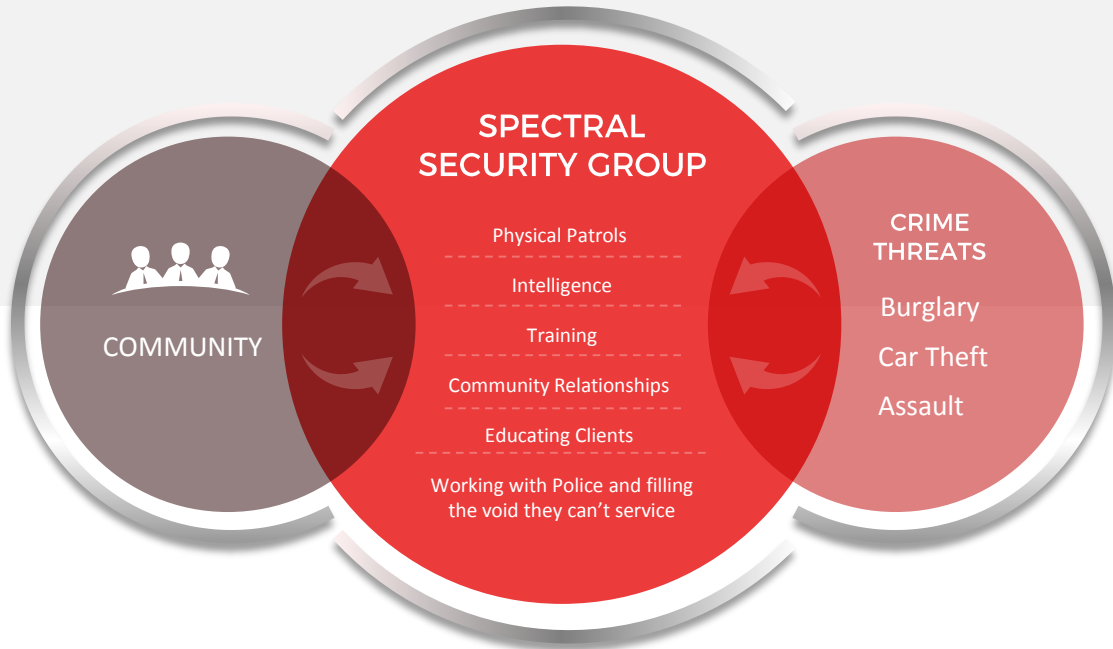

Risk Assessment and Management

Spectral Security has a holistic approach to risk assessment and risk management. We identify possible threats utilising a standardised threat/risk matrix and implement risk management strategies to mitigate the client's exposure.

Investigations

Spectral security investigation strategies were established utilising 30 years of law enforcement experience globally. Our investigators work within the scope of relevant industries and jurisdictions to ensure compliant work practices are maintained.

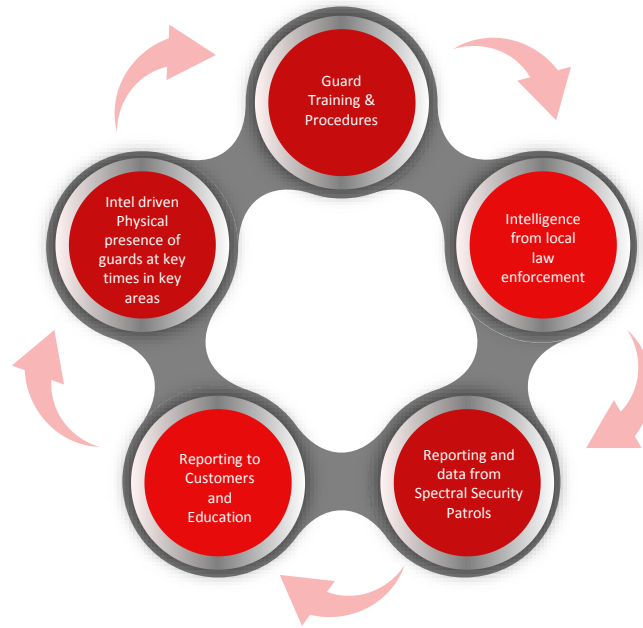

Our range of services in this field includes (but are not limited to):

◆ ELECTRONIC SECURITY ◆
